EDUCATIONAL AND CAREER CHOICES FOR STUDENTS AND PARENTS: THE ROLE OF LABOUR MARKET INFORMATION - KEY FINDINGS

Parents and students agree

that the best time to start receiving labour market information is during high school.

The most sought-after types of information by college and university students before enrolling in post-secondary education were:

salaries and wages (63%), skill requirements (53%), and current job openings (49%).

Almost 2/3: 62%

of current college and university students reportedly looked for labour market information before enrolling in their post-graduate degrees and believe it had a significant impact on their decision.

When asked how labour market information affected their careers...

both students and parents said that it confirmed the student's choice to pursue a particular career or education path.
