

Corporation of the Municipality of Temagami

Memo No.
2023-M-180

Memorandum to Council

Subject:	Repairs for Fox Run
Agenda Date:	September 14th 2023
Attachments:	ED Seguin & Sons – Clarification from Tulloch

RECOMMENDATION

BE IT RESOLVED THAT Council receive report 2023-M-180 on the updated pricing from Seguin and Sons for Fox Run;

AND FURTHER THAT Council Authorize the work to commence as outlined in this report, acknowledging the potential increase costs for guardrails.

INFORMATION

At the last regular Council meeting on August 10th 2023 it was decided by Council to get an updated price for the completion of the Gravel and Guardrails for the Fox Run project (Resolution Number 23-307). Public Works has received an updated price from Seguin and Son's for the work to be completed (see attachments provided) the Gravel prices stayed the same as original but the Guardrails went up a bit because of steel and cement increases, the guiderail wire and cement anchor blocks are the price increases. Provided are 2 quotes on the guardrails, one quote is for reusing the old anchor blocks as long as there is no deterioration of any sorts on the old anchors then reuse them. The second quote is for all the cement anchor blocks to be changed with new anchor blocks including new turn buckles etc. This is for the worst-case scenario with no surprises, but I thought council should be aware of any or all scenarios.

Public Works agrees with the Engineering report from Tulloch that when this work is completed this year and if everything seems good in the spring of 2024 that Council consider resurfacing the entire road once frost is out of road in the summer of 2024.

Respectfully Submitted: Barry Turcotte
