

## **TEMAGAMI – ON CALL PRICING FOR HOUSEHOLD GRINDER PUMP SERVICING**

### **OCWA Resources & Commitments**

With the strength of our partnership and years of support to Temagami, the Ontario Clean Water Agency (OCWA) is submitting our proposal for the after-hour servicing and on-call response management for the household sewage grinder pumps within the boundaries of Temagami.

We are pleased to have this opportunity to strengthen our partnership with the Town through our services. Our working knowledge of the industry and our positive working relationship can help us transition smoothly, effectively, and in a supportive manner.

#### **Scope of Service**

It is understood that the Municipality of Temagami would like for OCWA to provide a price estimate for managing the on-call schedule for the servicing of household grinder pump systems on weekends and stat holidays. It is also understood that OCWA would maintain inventory, critical parts, and the ability to rebuild pumps and have them ready for return to service.

#### **Pricing**

As understood, OCWA is a cost-recovery agency, and as such must price services so that we recover costs and benefits for our services. For this service, OCWA would dedicate an operator to be exclusively on call for this service.

- Weekend coverage can be performed for **\$9929.00**
- Stat coverage can be performed for **\$1145.60**
- Rebuilding of pumps would be priced as per our current agreement for out-of-scope services.
