

Corporation of the Municipality of Temagami

Memorandum to Council

Memo No.

2024-M-052

Subject: Temagami Island Dock

Agenda Date: March 14, 2024

Attachments: N/A

RECOMMENDATION

BE IT RESOLVED THAT the Council for the Corporation of the Municipality of Temagami does hereby receive report 24-M-052 from the Municipal Clerk for information purposes.

INFORMATION

I spoke to a past Councilor that we thought may have some background knowledge on the dock and who is responsible for the care and maintenance of the dock.

The Temagami Community Foundation did the fundraising for the dock and had Russ Manderstrom build it. The following season it suffered some damage and Russ fixed it as a sort of warranty gesture.

At the time of building the dock, the OldGrowth committee which included TCF as the lead, Friends of Temagami, the Municipality (Lorie Hunter), TLA, TFN and other groups were all working to develop the trails on the island and in White Bear. Friends of Temagami did the maps and Kiosk, TCF fundraiser, TLA supplied some labor and the Municipality agreed to accept the dock and cover it with the Municipalities insurance. Similar to a road, it gets built then handed over provided it is done within standards. The Old Growth committee dissolved over time. And I'm no longer involved with TCF (I was the ED) at the time.

This question comes up from time to time when the dock needs repair or protection in the fall for freeze up. To my knowledge various people have helped out just to make sure the dock is useable. I think the town may have done some work on it in the past.

Respectfully Submitted
