

Corporation of the Municipality of Temagami

Memorandum to Council

Memo No.

2024-M-058

Subject: TLA – Boat Washing Station

Agenda Date: April 11, 2024

Attachments: Correspondence

RECOMMENDATION

BE IT RESOLVED THAT the Council for the Corporation of the Municipality of Temagami does hereby receive report 24-M-058; and

FURTHER THAT the Council for the Corporation of the Municipality of Temagami does hereby direct staff to explore funding and grants to make this a reality.

INFORMATION

OZero Solutions is the Quebec company that designed their facility and I recently had a zoom call with their sales representative to get more information about their products. They have about 30 sites in Quebec, another three in the Maritimes and are working on three facilities for DFO. Most of their units use propane heated hot water with electric pressure washers.

Ballpark costs are \$30 to 40k for mobile or permanent facilities, the latter lower if there is already a shed. They also did the pay option that was installed at Blue Sea and that is estimated \$15 to 20k more. They will be traveling around Quebec with their mobile unit this season and in April may give us an idea as to a date when they could come for a demo.

Does the municipality/TFN have suggestions for a site that would offer access to a water source and ideally electricity? If grant opportunities present themselves is there interest in partnering with the TLA? Would there be any interest on the part of council to either meet over zoom with the OZero Solutions representative or view a demo this summer.

Respectfully Submitted

Rhonda Smith
