INFORMATION

Public works would like to inform Council that we had a sewer leak at the Post Office. After finding the Sewer Shut Off we found where the leak was and that it looked like it had been damaged a bit before we got there. The line was split for an half an inch at the spot where it was damaged before, so we cut the split out and then thawed the line which was frozen from 4' from the building to the sewer shut off across the street going north.

Ray and Sons thawed the line to the sewer shut off across the street and we repaired it, tested it for leaks (all was good) insulated and buried it that night, OCWA was there to assist us.

Once again I cannot predict where it froze first due to the shut off being across the road from the residence, but would like to let the owner know who pays for what? Our policy states that the home owner pays from the shut off to their residence, but like the water lines on Springgarden that Council was recently informed about, the shut off is across the road from the property.
